

LORGAR

TRIX 510

Wireless gamepad

TRIX 510 WIRELESS GAMEPAD

Lorgar TRIX 510 is a multi-platform wireless controller optimized for gaming on PC (Windows, iOS), Android, iOS, Nintendo Switch and PS3.

Due to wireless connection with technology BT 5.0 you play up to 10 m from computer/monitor.

Rechargeable lithium-ion battery 600 mAh makes possible to play nonstop up to 8 hours on a single charge, and keep playing while the controller charges.

Placement of all control elements is common for most of gamepads, so you can change your old gamepad for a Trix 510 without any discomfort.

2 vibration motors respond on your actions, help to control playing and enjoy tactile contact.

Embedded motion sensor repeats your body movement for intuitive control while playing in Nintendo Switch.

Led lightings on the button makes comfort playing even in the dark.

Plug and play technology lets you easily connect gamepad to the gaming device without any additional software.

Enjoy the gaming with gamepad Trix 510!
